LEGUMES

Black-Eyed Peas

Vigna unguiculata

MACHINE-CLEANED

DESCRIPTION

Egyptian black-eyed peas (*Vigna unguiculata*) from the Nile Delta — cowpeas — are supplied whole and dried. The crop is a staple across Africa, the Middle East, the southern United States and South Asia, and it is bought principally by canners, retail packers and the food-service trade.

Buyers judge black-eyed peas on size uniformity, the brightness of the cream-coloured seed and the definition of the black eye, the proportion of split, shrivelled and discoloured seed, and on cooking behaviour. Colour is commercially significant because the seed is usually visible in the finished dish.

Applications include canning and ready-meal manufacture, soup and stew production, food service and institutional catering, retail packing, and traditional preparations across several cuisines.

The Nile Delta's fertile alluvial soils and the reliable dry harvest window suit the crop, and material passes a cleaning sequence with de-stoning, sieving, gravity separation, aspiration and magnetic separation, with optical sorting where a colour or foreign-matter specification requires it. Each shipment carries a certificate of analysis for the lot supplied. Specifications are available upon request and can be tailored to buyer requirements, including size grade and packing format. We ship FOB Alexandria with the complete export documentation set. Samples are available for evaluation against your own criteria.

COMMERCIAL TERMS

ORIGIN

Nile Delta, Egypt

FORM / PROCESSING	Whole Dried
MINIMUM ORDER QUANTITY	10 MT
PACKAGING	50 kg PP Sacks
PORT OF LOADING	Alexandria, Egypt

Full laboratory specifications for this product are issued on request and accompany every shipment as a Certificate of Analysis.
