Broad Beans (Fava)

Vicia faba

PREMIUM EXPORT GRADE

DESCRIPTION

Egyptian fava beans (*Vicia faba*) from the Nile Delta are supplied whole, peeled and split. Fava is a staple across Egypt and the wider region, and the three forms serve distinct markets: whole beans for traditional slow-cooked preparations, peeled and split for faster-cooking and processed applications.

Buyers judge fava on size uniformity, colour, the proportion of damaged and discoloured seed, and on cooking behaviour. Size grade should be stated as a screen specification, since trade terminology varies between markets and two suppliers describing the same nominal grade may be offering different material.

Applications include canning and ready-meal manufacture — ful medames in particular — food service and institutional catering, retail packing, flour and processed-food manufacture, and traditional preparations across the Middle East and North Africa. Demand is steady rather than seasonal, though it concentrates ahead of Ramadan.

The Nile Delta's fertile alluvial soils and reliable dry harvest window suit the crop, and material passes a cleaning sequence with de-stoning, sieving, gravity separation, aspiration and magnetic separation, with optical sorting where specified. Each shipment carries a lot-specific certificate of analysis. Specifications are available upon request and can be tailored to buyer requirements, including size grade and form. FOB Alexandria with the complete export documentation set.
