TECHNICAL DATA SHEET

MEDICINAL HERBS

Dill Weed

Anethum graveolens

MACHINE-CLEANED & SORTED

DESCRIPTION

Egyptian dill weed (*Anethum graveolens*) from Fayoum is supplied cut and sifted and whole. Dill weed is the dried leaf and stem, and it is a distinct product from dill seed — worth stating explicitly in an enquiry, since the two have different applications and different specifications.

Cut and sifted material is screened to an agreed size for blending, seasoning manufacture and applications where consistent particle size matters. Whole material is supplied where the buyer prefers to cut close to use or where leaf appearance is part of the finished product.

Applications include seasoning and spice blends, fish and dairy applications, pickling, soup and sauce manufacture, and food service. Colour and aroma are usually specified together, since dill weed contributes visually as well as by flavour in most of its uses.

Fayoum's dry harvest window allows the delicate leaf to be dried quickly, which preserves both the volatile oil and the green colour — the two properties that separate well-handled dill weed from material that has been dried too slowly. Material is cleaned to remove coarse stalk and field debris, and every shipment carries a certificate of analysis for the lot supplied. Specifications are available upon request and can be tailored to buyer requirements. FOB Alexandria with the full export documentation set; packing discussed per order. Samples available for evaluation.

COMMERCIAL TERMS

ORIGIN

Fayoum, Egypt

FORM / PROCESSING	Cut & Sifted / Whole
MINIMUM ORDER QUANTITY	5 MT
PACKAGING	25 kg PP Bags
PORT OF LOADING	Alexandria, Egypt

Full laboratory specifications for this product are issued on request and accompany every shipment as a Certificate of Analysis.
