TECHNICAL DATA SHEET

CULINARY SPICES

Fenugreek

Trigonella foenum-graecum

HIGH DIOSGENIN GRADE

DESCRIPTION

Egyptian fenugreek (*Trigonella foenum-graecum*) from Upper Egypt is supplied as whole seeds and powder. Fenugreek is unusual in serving three quite different markets — culinary, nutraceutical and feed — and the specification that matters differs sharply between them, so an enquiry should state the intended use.

Whole seed is supplied for culinary grinding, for germination and sprouting applications, and for extraction. Powder is supplied where the buyer's process requires it, noting that fenugreek powder is hygroscopic and benefits from a moisture barrier in packing.

Applications include spice blends and curry powder manufacture, bakery, traditional beverages, botanical extraction for the nutraceutical and food-supplement industries, and animal feed. Buyers formulating for the supplement market usually have documentation and traceability requirements considerably above those of the culinary trade, and those are agreed before contracting.

Upper Egypt's irrigated season and dry harvest window allow the seed to be dried quickly, and the crop passes a cleaning sequence removing stalk, chaff, soil, stones and off-size seed. Each shipment carries a certificate of analysis for the lot supplied. Specifications are available upon request and can be tailored to buyer requirements, and technical specifications are provided according to destination-market requirements. We ship FOB Alexandria with the complete export documentation set; packaging options

can be discussed based on order requirements.

COMMERCIAL TERMS

ORIGIN	Upper Egypt
FORM / PROCESSING	Whole Seeds / Powder
MINIMUM ORDER QUANTITY	5 MT
PACKAGING	25 kg PP Bags
PORT OF LOADING	Alexandria, Egypt

Full laboratory specifications for this product are issued on request and accompany every shipment as a Certificate of Analysis.
